ABSTRACT

This report, Volume I of a 2-part presentation, covers salaries paid in 1970-71 to full-time public school teachers, principals, and other members of the instructional staff. The data are presented in summary form for the various categories of personnel in the reporting systems grouped by enrollment, and for these systems individually. Also presented are national estimates of the salaries paid the various groups of personnel and the number of full-time professional employees classified by sex. Volume II is cited under EA 003 827. FOREWORD

THIS REPORT, presented in two volumes, is the 25th Biennial Salary Survey made by the NEA Research Division in the continuous and concentrated effort of the National Education Association to improve teacher salaries. Volume I covers salaries paid in 1970-71 to full-time public-school teachers, principals, and other members of the instructional staff; Volume II covers salaries paid central-office personnel. For complete information on salaries paid full-time professional employees in public school systems, both volumes are essential.

The data are presented in summary form for the various categories of personnel in the reporting systems grouped by enrollment, and for these systems individually. Also presented are national estimates of the salaries paid the various groups of personnel.

A new aspect of this report is the number of full-time professional personnel in both the instructional staff and central-office positions shown by sex. These data provide means of comparing the proportions of various positions filled by men and by women.

The 1970-71 Biennial Salary Survey was made under the direction of Gertrude N. Stieber, Senior Professional Associate, with the assistance of the staff of the Statistics Section of the NEA Research Division.

The Division is grateful for the help provided by administrators of the cooperating school systems who provided the mass of detailed information necessary for this study. Special thanks are due the State Departments of Education of Mississippi, New York, and Pennsylvania which supplied data for most of the school systems of these states which are included in the study.

Glen Robinson
Director, Research Division

I. INTRODUCTION

THIS STUDY, undertaken biennially by the NEA Research Division, is the 25th in a continuing series of comprehensive reports on salaries paid full-time professional staff members of public school systems. The results of the survey are contained in two volumes: Volume I comprises data on salaries paid in 1970-71 to teachers and to other members of the instructional staff; Volume II covers similar information for superintendents and other members of the central-office administration.

An estimate of the total number of persons employed full time in various instructional staff and central-office positions by sex is also included. This is the first time that information on the number of professional employees classified by sex has been incorporated in the survey. Salary distributions on the basis of sex are not included, however, but such a distribution may be attempted in a later study.

National estimates of mean and median salaries, and salary distributions for teachers, principals, counselors, librarians, and other members of the full-time instructional staff are included in this volume (Volume I) of the report. In addition, detailed salary data are shown for these same positions for reporting systems with enrollments of 12,000 or more. These data consist of summary tabulations showing mean, median, and salary distributions as well as system-by-system listings of the data for each reporting system with an enrollment of 12,000 or more.

An analysis of salary *schedule* information is made annually by the Research Division, and three major research reports are published—two annually and one on a biennial basis.[1] The salary schedule studies report minimum and maximum salaries for teachers and principals, and maximum salaries for other members of the instructional staff and for the major central-office positions.

Scope of Study

Salary data for all of the approximately 17,153 school systems operating in 1970-71 are incorporated in the biennial salary survey. A comprehensive questionnaire was sent to each of the 578 systems with enrollments of 12,000 or more, and to a representative sample of the estimated 16,575 systems with enrollments of less than 12,000. Table 1 shows the distribution of school systems to which questionnaires were sent, and the number and percent of those queried which furnished at least some usable salary data.

Enrollment stratification is based on a list of operating districts originally obtained from the U.S. Bureau of the Census, which gave enrollment information, for the most part as of October 1966. The NEA Research Division in its questionnaire requested enrollment data for October 1970.

For purposes of arriving at nationwide summary data, school systems in the nine enrollment strata into which operating school systems are divided, have been combined into the four major enrollment groups shown in Table 1. The four groups have been designated as follows:

A. Large systems—enrollment 25,000 or more (Strata 1-3)
B. Medium systems—enrollment 3,000-24,999 (Strata 4-6)
C. Small systems—enrollment 300-2,999 (Strata 7 and 8)
D. Very small systems—enrollment below 300 (Strata 9 and 10).

Procedure in Collecting and Handling Data

Salary inquiries were sent to *all* operating systems with enrollments of 12,000 or more (Strata 1 to 4), and all of these districts which reported usable data for one or more positions are included in the system-by-system listings which appear in Volume I for instructional staff positions and in Volume II for central-office administrators.

For school systems with fewer than 12,000 pupils, systematized random sampling was used in selecting those to receive the salary questionnaire. Table 1 reports the sampling ratios used.

All of the 578 districts with enrollments of 12,000 or more were queried, and 452 usable

[1] National Education Association, Research Division. *Salary Schedules for Teachers, 1970-71.* Research Report 1970-R12. Washington, D.C.: the Association, 1970. 127 p. $3.00. Stock No. 435-25456. *Maximum Salaries Scheduled for School Administrators, 1970-71.* Research Report 1971-R2. Washington, D.C.: the Association, 1971. 100 p. $2.50. Stock No. 435-25466. *Salary Schedules for Principals, 1969-70.* Research Report 1970-R5. Washington, D.C.: the Association, 1970. 82 p. $1.50. Stock No. 435-22928.

replies are included in the system-by-system data. However, to make up the Group B systems for national estimates (see Table 1) a subsample of the appropriate size was drawn from the replies in Stratum 4 (enrollment 12,000 to 24,999) and added to the replies from the sample of Strata 5 and 6 districts (enrollments 6,000 to 11,999 and 3,000 to 5,999, respectively).

Salaries paid teachers and other members of the instructional staff were obtained on the basis of specified salary intervals, and means and medians were prepared from the grouped salary distributions.

The information requested on salaries of all central-office personnel was for the individual salary amounts paid to each person in each position. For example, if a school system employs five assistant superintendents, the individual salary paid to each of the five assistant superintendents was requested. Summary tables were prepared for central-office personnel by computing actual means and medians from the ungrouped raw salary data.

Number of Public-School Employees Included

Table 3 shows, among other things, that the 192 systems with enrollments of 25,000 or more, accounted for only 1.1 percent of the total operating public school systems in 1970-71, but that these districts employed 27.8 percent of all full-time teachers.

At the other extreme, the estimated 5,435 operating districts with enrollments of under 300 each, account for 31.7 percent of all operating systems, but employ only 2.5 percent of all teachers.

Similar percentage distributions by size of school system are shown in Table 3 for elementary-school principals, superintendents, and other professional staff positions.

The concentration of principals at the elementary-school level follows fairly closely the distribution of teachers. On the other hand, only 13.2 percent of the senior high-school principals are employed in systems with enrollments of 25,000 or more; in this group of districts high schools tend to be very large, and many teachers may report to one principal.

Table 3 also shows that the concentration of local-district superintendents is greatest in Group C, which accounts for 59.4 percent of all superintendents. This is understandable since 8,537, or 49.8 percent, of all operating systems are in this enrollment group. Only 1.3 percent of all superintendents are working in the large Group A districts.

Even though 31.7 percent of all operating systems are in Group D (enrollment under 300), only 18.5 percent of all superintendents are employed by this group of systems. Many of these systems are administered by a county or intermediate superintendent even though they are classified as separate operating school systems.

Only a few central-office administrators (other than the superintendent) are found in the smallest school systems. This is understandable since the administrative functions in these systems usually are performed by the superintendent with no professional assistance.

From this study it was estimated that a total of 2,034,581 full-time teachers were employed in public school systems in the United States during 1970-71.[2]

There were an estimated 47,714 elementary-school supervising and teaching principals, 8,782 junior high-school principals, and 13,763 senior high-school principals. It was further estimated that there were 5,119 elementary-school assistant principals working in public schools in 1970-71; 6,777 junior high-school assistant principals, and 11,403 senior high-school assistant principals.

Among other professional employees assigned to individual schools, it was estimated that there were 39,348 full-time school counselors in all operating systems, and 6,002 social workers and/or visiting teachers. Full-time school librarians were estimated to number 30,757.

An estimated total of 15,639 school nurses were employed by public-school systems in the United States in the same year. This does not include county or city public health nurses who work in public schools in many districts.

Number of Professional Employees Classified by Sex

Of the estimated 2,034,581 full-time teachers in 1970-71, 1,366,830, or 67.2 percent, were women. However, of the 70,259 supervising principals, only 10,765, or 15.3 percent, were women. Almost the same ratio of men to women was found for assistant principals. Only 19.4 percent of the estimated number of elementary-school principals

[2]This compares with an estimate of 2,039,891 teachers made in December 1970. See: National Education Association, Research Division. *Estimates of School Statistics, 1970-71.* Research Report 1970-R15. Washington, D.C.: the Association, 1970. p. 31. The U.S. Office of Education estimated that there were 2,061,115 full-time and part-time elementary- and secondary-school teachers in the fall of 1970. See: U.S. Department of Health, Education, and Welfare, Office of Education. *Statistics of Public Schools, Fall 1970.* Washington, D.C.: Government Printing Office, March 1971. p. 14.

and only 3.0 percent of the senior high-school principals were women. (Table 3-A)

For other instructional staff positions shown in Table 3-A, heads of departments, with 69.2 percent men, and counselors, with 53.1 percent men, were the only ones in which the number of men exceeded the number of women employees. As would be expected, 99.2 percent of all school nurses were women, and 91.4 percent of the school librarians also were women. Men accounted for 45.9 percent of the psychologists and psychometrists and for 41.7 percent of the positions which were not reported by functional title.

For the total instructional staff, comprising teachers, principals, and other full-time professional positions in individual schools, 782,471, or 35.0 percent of the estimated 2,236,906 persons, were men, and 1,454,435, or 65.0 percent were women.

Of the total estimated 65,306 central-office administrators in 1970-71, 48,391, or 74.1 percent, were men and 25.9 percent were women. Of the central-office categories shown in Table 3-A, men accounted for 99.4 percent of all superintendents. Of the 10,414 administrators for general administration, women held 48.2 percent of the positions included in this category, largely in the area of elementary education. Women held 38.3 percent of the administrative positions in the area of pupil personnel services.

For the total estimated full-time professional staff of all schools, 830,862, or 36.1 percent, were men, and 1,471,350, or 63.9 percent, were women.

Women dominate the professional staff of public schools because of the preponderance of women teachers, nurses, and librarians. These three groups accounted for 1,410,442, or 95.9 percent of all professional women employed in public school systems in 1970-71.

Men far exceed women in the authority positions such as principals, superintendents, deputy, associate, and assistant superintendents, and in other central-office administrative areas. Of the total 158,864 in this group in 1970-71, only 31,186, or 19.6 percent, were women.

TABLE 1.—DISTRIBUTION OF PUBLIC SCHOOL SYSTEMS INCLUDED IN NATIONAL SURVEY, BY ENROLLMENT GROUPING[a]

Enrollment grouping	Estimated total number of operating school systems, 1970-71	Systems to which inquiry was sent		Systems reporting usable salary data	
		Number	Percent of total	Number	Percent of those queried
1	2	3	4	5	6
Group A—Large systems, enrollment 25,000 or more (Strata 1, 2, and 3)	192	192	100.0%	160	83.3%
Group B—Medium systems, enrollment 3,000 to 24,999 (Strata 4, 5, and 6)	2,989	374[b]	12.5	300[b]	80.2
Group C—Small systems, enrollment 300 to 2,999 (Strata 7 and 8) . . .	8,537	356	4.2	292	82.0
Group D—Very small systems, enrollment below 300 (Stratum 9) .	5,435	350	6.4	243	69.4
Total—all systems	17,153	1,272	7.4%	995	78.2%

[a]The enrollment grouping shown here was derived by the NEA Research Division from the basic stratification of operating districts originally obtained from the U.S. Bureau of the Census. Enrollment figures are for October 1970.

All estimated national averages and distributions shown in this report are computed on the basis of this grouping. Summary data for this group are shown in Tables 5-49 of Vol. 1 and Tables 5-33A of Vol. 2.

[b]Salary inquiries were sent to each of the 386 operating school systems with enrollments of 12,000 to 24,999 for purposes of the individual listing of systems with enrollments of 12,000 or more. Usable salary data were received from 292, or 75.6 percent of the total. To report national averages for medium-size districts as a group, a random sample of 48 districts in Stratum 4 (enrollment 12,000-24,999) was selected to combine in the proper proportion with the sampling made of districts in Strata 5 and 6 (enrollments of 3,000 to 5,999, and 6,000 to 11,999). This sample comprises Group B.

TABLE 2.—DISTRIBUTION OF PUBLIC SCHOOL SYSTEMS WITH ENROLLMENTS OF 12,000 OR MORE[a] INCLUDED IN SUMMARY

Enrollment stratum	Total number of operating systems[b]	Systems reporting usable data	
		Number	Percent of total
1	2	3	4
Stratum 1—enrollment 100,000 or more	27	24	88.9%
Stratum 2—enrollment 50,000-99,999	56	45	80.4
Stratum 3—enrollment 25,000-49,999	109	91	83.5
Stratum 4—enrollment 12,000-24,999	386	292	75.6
Total—all systems with enrollments of 12,000 or more	578	452	78.2%

[a]Systems for which data are shown on a system-by-system basis in Tables 35-49 of Vol. 1 and Tables 28-33A in Vol. 2.

[b]Questionnaire was sent to each of the 578 systems.

a/ Comprises staff personnel, research, food services, health services, pupil transportation, community relations, publications and/or information, and federal and/or state grants and aids.

b/ Comprises general finance, purchasing, accounting and auditing, data processing, buildings - operation and maintenance, and buildings - planning and construction.

c/ Comprises general personnel, attendance, guidance and testing, psychological and psychiatric services, and programs for the disadvantaged.

d/ Comprises general, elementary education, secondary education, adult education, special education, library services, instructional materials, and audiovisual education.

e/ Comprises art, home economics, industrial arts, music, physical and health education, vocational education, mathematics and/or science, English and/or reading, foreign languages, social sciences, and other.

II. NATIONAL ESTIMATES OF SALARIES PAID MEMBERS OF THE INSTRUCTIONAL STAFF, 1970-71

Teachers

THE AVERAGE SALARY PAID all full-time public-school teachers in 1970-71 was estimated to be $9,218 (Table 5). This is $47 less than the advance estimate of $9,265 published by the NEA Research Division in December 1970.[1] The U.S. Office of Education estimated an average salary of $9,210 for 1970-71.[2] These two estimates were based on data from state departments of education covering all districts within the respective states. For this report, salary data were received directly from a sample of local school systems during the fall and winter of 1970-71.

Only 0.3 percent of all teachers were estimated to have received less than $4,500 in 1970-71. This compares with 0.9 percent in 1968-69, and with 3.5 percent in 1966-67. Only 0.1 percent of the teachers in systems with enrollments of 25,000 or more were in this salary category. On the other hand, 3.2 percent of the teachers in Group D districts (enrollments below 300) were paid less than $4,500.

A total of 34.0 percent of all teachers were estimated to have been paid $10,000 or more in 1970-71. This compares with 17.5 percent two years earlier and with less than 1 percent in 1962-63. In the largest systems, 42.3 percent of all teachers received $10,000 or more in 1970-71, compared with 27.9 percent in 1968-69, and with 13.3 percent in 1966-67.

The mean salary of $9,766 paid teachers in 1970-71 by the large Group A systems was 5.9 percent above the estimated national average of $9,218, and 34.5 percent above the average of $7,262 paid teachers in the small (Group D) systems.

[2]U.S. Department of Health, Education, and Welfare, Office of Education. *Statistics of Public Schools, Fall 1970.* Washington, D.C.: Government Printing Office, March 1971. p. 36.

Principals

Supervising principals—Salary distributions shown in Tables 6, 7, 8, and 9 are based on estimated totals of 40,453 elementary-school supervising principals, 7,261 elementary-school teaching principals, 8,782 junior high-school principals, and 13,763 senior high-school principals, or a total of 70,259 supervising and teaching principals.

The mean salary in 1970-71 for all elementary-school supervising principals was estimated to be $15,126; for junior high-school principals, $15,808; and for senior high-school principals, $15,042. Since the largest districts and frequently districts that pay high salaries usually are more likely than others to have junior high schools, it is not surprising that the nationwide average salary of junior high-school principals exceeds that of senior high-school principals.

The average salary of $18,724 for high-school principals in districts with enrollments of 25,000 or more is 94.4 percent higher than the average of $9,632 for districts with enrollments under 300 (Group D). Only 0.4 percent of senior high-school principals in the largest districts (Group A) received less than $10,000; 61.7 percent of those in Group D were being paid less than $10,000 in 1970-71.

Assistant principals—Estimated national average salaries for assistant principals for elementary-, junior, and senior high-school assistant principals are shown in Tables 10, 11, and 12.

The estimated mean salary for all elementary-school assistant principals in 1970-71 was $14,967; for junior high-school assistant principals, $14,836; and $14,639 for senior high-school assistant principals. For the most part only the largest and usually the highest paying systems have assistant principals at the elementary- and junior high-school levels. This no doubt accounts for these mean salaries exceeding that for senior high-school assistant principals.

Other Professional Personnel on the Instructional Staff

Estimated national mean salaries were computed for each of the six positions shown in

Tables 13 through 18. Medians, quartiles, and salary distributions by enrollment grouping are shown also. These data concern nonteaching full-time professional personnel assigned to individual schools and exclude all central-office positions which are considered in Volume II of this study.

A summary of mean salaries for these positions is shown below for the six positions.

Position	Mean salaries, by enrollment grouping				
	Total–national estimate	A–25,000 or more	B–3,000-24,999	C–300-2,999	D–under 300
Heads of departments	$12,964	$14,086	$13,203	$10,276	$8,083
Counselors	12,051	12,557	12,261	10,892	9,250
Librarians	9,806	10,297	10,199	8,801	6,472
Social workers and/or visiting teachers	10,758	11,992	10,486	8,590	[a]
Psychologists and psychometrists	13,271	13,659	13,451	11,569	[a]
Nurses	8,634	9,667	8,940	7,396	5,812

[a] None reported for Group D systems.

Table 4, *Comparison of Mean Salaries Paid in 1970-71 with Those Paid in Previous Years, Selected Positions,* is presented in two parts. The first part, on page 14, gives the average salaries paid at two-year intervals from 1962-63 to 1970-71. The second part, on page 15, gives the indexes of these salaries based on the salaries paid in 1962-63 as 100.0.

III. SALARIES PAID IN 1970-71 TO MEMBERS OF THE INSTRUCTIONAL STAFF–REPORTING SYSTEMS WITH ENROLLMENTS OF 12,000 OR MORE

AS INDICATED EARLIER, salary information was requested from each of the 578 operating systems with enrollments of 12,000 or more, and usable replies were received from 452, or 78.2 percent.

Data on salaries paid teachers, principals, and other members of the instructional staff of individual school buildings are presented in this volume of the report; data on salaries paid various central-office positions are included in Volume II. These data are presented in summary tabulations and as system-by-system listings of those districts which reported usable salary information.

Tables 19 through 34 summarize the data on instructional staff positions which appear in the individual listings of reporting systems in Tables 35 through 49. Not all of the 452 systems with enrollments of 12,000 or more furnished salary information for each position listed and summarized; each of them, however, furnished some usable information in one or more areas of the study.

The mean salary for teachers in systems with enrollments of 12,000 or more in 1970-71 was $9,761. This is $543, or 5.9 percent, higher than the national estimated average of $9,218. In the 27 large systems, (enrollments of 100,000 or more) the average was $10,388, or 12.7 percent higher than the estimated national average.

As shown in Table 20, 425 systems with enrollments of 12,000 or more reported salary information by preparation level. These 425 systems employed 665,342 teachers in 1970-71. Of this number, 375,548, or 56.4 percent, had bachelor's degrees but less than five years of college; 190,764, or 28.7 percent, had a master's degree but less than six years of college; 65,457, or 9.8 percent, had six years of college but less than seven; and 17,566, or 2.6 percent, had 7 years of college or a doctor's degree. Table 20 also shows the index relationship of mean salaries of each preparation level shown to that of the bachelor's degree.

As shown in Table 21, almost 24 percent of the systems reporting salary data for teachers in 1970-71 were in the Far West, many of them in California. Over 21 percent were in the Southeast; the prevalence of the county-unit system in this area accounts for the large number of Southeastern school systems in this enrollment category.

Tables 22 through 27 give summary data on salaries paid heads of departments, counselors, librarians, nurses, social workers and visiting teachers, and psychologists and psychometrists.

Tables 28 through 34 give, by reporting systems with enrollments of 12,000 or more, salaries paid principals and assistant principals in elementary, junior high, and senior high schools for 1970-71.

Tables 35 through 49 are system-by-system listings of salaries paid teachers, principals, and other members of the professional staff in individual schools for reporting systems with enrollments of 12,000 or more. As indicated above, 452 districts in this enrollment grouping furnished some usable salary data, but not all of them reported for each of the positions included in the study.
